

Catalog:

The folder has following components:

- README.md : It contains important information about usage of this program. Read it for more details.
- SlideThruLectures.py : The Python program file for the project
- Data Folder : It contains subfolders with video and transcript data which is usable by the program. The subfolders have two folders inside them, one is for videos and other is for transcript files. I have added some lectures in it from KBAI and ML4T for testing.
- templImages: It is a folder that is used for temporary image data storage during execution of program. It also contains UI images used by program.
- requirements.txt : The package requirement file which can be used to install dependencies.
- CourseSlides.pptx : It is an example of generated pptx file.
